PROFESSIONAL SUMMARY

Software Engineer skilled in Python, Django, FastAPI, and Flask, with hands-on experience in REST API design, SQL databases, and ML integration. Built and shipped 6+ real-world projects spanning e-commerce, HR, inventory management, and computer-vision/NLP systems. Seeking a Backend or Full-Stack Developer role to apply strong OOP, DSA, and clean-code fundamentals in production.

TECHNICAL SKILLS

- Languages: Python, JavaScript, SQL
- Backend Frameworks: Django, Flask, FastAPI, REST API Development
- Frontend: HTML5, CSS3, JavaScript, Bootstrap, React
- Databases & Cloud: MySQL, PostgreSQL, SQLite, Supabase
- AI / Machine Learning: TensorFlow, Scikit-learn, Hugging Face Transformers, OpenCV, NumPy, Pandas, Matplotlib, Seaborn
- Tools & Practices: Git, GitHub, VS Code, Agile/Scrum, MVC Architecture, CRUD, API Integration, Role-Based Authentication

PROFESSIONAL EXPERIENCE

Software Engineer Intern — Sofrix

Dec 2025 – Feb 2026

- Developed and tested machine learning models for real-world applications, improving model reliability through iterative debugging and validation.
- Collaborated with senior developers on feature enhancements and UI improvements across enterprise-grade applications built on MVC architecture.
- Followed clean-code standards and Agile team workflows, contributing to scalable full-stack development.

Python Developer Intern — Code Sentinel

Aug 2025 – Sep 2025

- Built and deployed 5 Python applications (Temperature Converter, Contact Book, To-Do List, Web Scraper, Weather Dashboard) covering CRUD operations, API integration, and data persistence.
- Maintained version control using Git/GitHub, documenting each project in a public repository for reproducibility.

CORE PROJECTS

EmotionSense — AI-Based Multimodal Emotion Detection System

- Built a real-time multimodal emotion recognition system fusing facial expression and text sentiment analysis.
- Implemented facial detection using OpenCV + CNN and text sentiment analysis using BERT/NLP (Hugging Face Transformers).
- Integrated AI models into a real-time application pipeline using Python, TensorFlow, and Flask with a modular, scalable architecture.

AI-Based Voice Command & Gesture Control System

- Built a Python application for hands-free computer control using real-time voice recognition and OpenCV + MediaPipe hand gesture classification.

Employee Management System — Django Web Application

- Built a full-stack Django application to manage employee records, attendance, and performance data.
- Designed an admin panel for HR operations with a responsive Bootstrap frontend.

Ecommerce Platform — Django Web Application

- Developed a feature-rich Django e-commerce platform with product listings, cart, checkout, order tracking, and payment integration on a MySQL backend with optimized queries.

Gourmet Management System — Django Web Application

- Developed a Django-based inventory and order management platform with role-based authentication and an interactive admin dashboard.
- Built with Django, SQLite, HTML, CSS, JavaScript, and Bootstrap using a responsive, scalable architecture.

EDUCATION

BS in Software Engineering — Riphah International University, Faisalabad

2022 – 2026

- CGPA: 3.51 / 4.0
- Relevant Coursework: OOP, Data Structures & Algorithms, Software Architecture, MVC, Software Project Management, Web Development

CERTIFICATIONS

- Web Development — Tecnsol Trainings (HTML/CSS, JavaScript, Bootstrap, Python, Django)
- IT Essentials — Cisco Networking Academy (Networking basics, cybersecurity, system troubleshooting)
