PROFESSIONAL SUMMARY

Software Engineer skilled in Python, Django, FastAPI, and Flask, with hands-on experience in REST API design, SQL databases, and ML integration. Built and shipped 6+ real-world projects spanning e-commerce, HR, inventory management, computer-vision/NLP systems, and animated frontend experiences. Seeking a Backend or Full-Stack Developer role to apply strong OOP, DSA, and clean-code fundamentals in production.

TECHNICAL SKILLS

- **Languages:** Python, JavaScript, SQL
- **Backend:** Django, Flask, FastAPI, REST API Development
- **Frontend:** React JS, Next.js, Tailwind CSS, HTML5, CSS3, Bootstrap
- **Databases:** MySQL, PostgreSQL, SQLite
- **AI/ML:** TensorFlow, Scikit-learn, Hugging Face Transformers, OpenCV, NumPy, Pandas, Matplotlib, Seaborn
- **Tools & Practices:** Git, GitHub, VS Code, Agile/Scrum, MVC Architecture, CRUD, API Integration, Role-Based Authentication

PROFESSIONAL EXPERIENCE

Software Engineer Intern - Sofrix

Dec 2025 – Feb 2026

- Developed and tested machine learning models for real-world applications, improving model reliability through iterative debugging and validation.
- Collaborated with senior developers on feature enhancements and UI improvements across enterprise-grade applications built on MVC architecture.
- Followed clean-code standards and Agile team workflows, contributing to scalable full-stack development.

Python Developer Intern - Code Sentinel

Aug 2025 – Sep 2025

- Built and deployed 5 Python applications (Temperature Converter, Contact Book, To-Do List, Web Scraper, Weather Dashboard) covering CRUD operations, API integration, and data persistence.
- Maintained version control using Git/GitHub, documenting each project in a public repository for reproducibility.

CORE PROJECTS

EmotionSense - AI-Based Multimodal Emotion Detection System

- Built a real-time multimodal emotion recognition system fusing facial expression and text sentiment analysis.
- Implemented facial detection using OpenCV + CNN and text sentiment analysis using BERT/NLP (Hugging Face Transformers).
- Integrated AI models into a real-time application pipeline using Python, TensorFlow, and Flask with a modular, scalable architecture.

KILN - Fully Animated Coffee Shop Website

- Designed and built a fully animated e-commerce-style frontend with React, Vite, Tailwind CSS, and Framer Motion, focused on natural motion and a cohesive brand feel rather than novelty animation.
- Implemented a custom, backend-free cart system from scratch using the Context API, with orders routed directly through WhatsApp and Email.
- Delivered a fully responsive experience across mobile, tablet, and desktop, sharpening frontend and UX skills alongside a primarily backend-focused skill set.

Employee Management System - Django Web Application

- Built a full-stack Django application to manage employee records, attendance, and performance data, with an admin panel for HR operations on a responsive Bootstrap frontend.

Gourmet Management System - Django Web Application

- Developed a Django-based inventory and order management platform with role-based authentication and an interactive admin dashboard, built with Django, SQLite, and Bootstrap.

EDUCATION

BS in Software Engineering - Riphah International University, Faisalabad

2022 – 2026

- CGPA: 3.51 / 4.0
- Relevant Coursework: OOP, Data Structures & Algorithms, Software Architecture, MVC, Software Project Management, Web Development

CERTIFICATIONS

- Web Development - Tecsol Trainings | IT Essentials - Cisco Networking Academy
